

CURRICULUM PLANNING CHART INSTRUCTIONS

Scheduling can be a challenge, especially if you have rotating volunteers! Teachers need to know which lesson to teach each week, but if they didn't teach last week it may be hard to keep track. Use this tool to make it easy to communicate with your volunteers.

Just fill in the dates that correspond with the week numbers of this quarter of curriculum. You can even add notes such as lesson titles, the name of the volunteer for that week, or other special instructions you want to include.

Once you've filled in the chart, you can print and share it, email it to your volunteers, or post it on your website or social media.
